HESUB CHAKA

Columbia, MO | chakahesub@gmail.com | +1 571-279-9268 | linkedin.com/in/hesub-chaka-07753818a

PROFESSIONAL SUMMARY

Data Science & Analytics graduate student with hands-on experience in data analysis, research data management, and machine learning. Transforms complex, inconsistent datasets into reliable information and actionable insights through analytical problem-solving, data quality improvements, and clear communication.

EDUCATION

Master of Science in Data Science and Analytics | May 2027
University of Missouri–Columbia | Columbia, MO
Emphasis: BioHealth Analytics | GPA: 3.83/4.0

Bachelor of Science in Information Technology | May 2025
University of Missouri–Columbia | Columbia, MO
Certifications: Cybersecurity; Web Application Development; Digital Media Design

SKILLS

Data & Analytics: Data Analysis, Statistical Analysis, Data Cleaning, Exploratory Data Analysis, Data Visualization, Machine Learning, Data Quality, Research Data Management
Programming & Querying: Python, SQL, R, C++, Java, TypeScript
Tools & Development: pandas, NumPy, Excel, Tableau, Jupyter, MongoDB, SQLite, Git, React, Node.js
Platforms: VS Code, Unix/Linux, GIS, Generative AI, AI-Assisted Analysis

EXPERIENCE

Paleontological Collections Data Assistant | Mar 2026 – Present
University of Missouri–Columbia, Geology Department | Columbia, MO

- Cataloged approximately 500 fossil specimens by converting historical records into structured Excel spreadsheets and a searchable museum database.
- Reviewed taxonomy, geology, locality, and specimen details against historical sources to improve record consistency and accuracy.
- Documented discrepancies in historical records to support standardized, reliable collection data.
- Georeferenced collection records with GIS tools and corrected coordinates in the museum database.

Research Assistant — MPOWER Research Project | Mar 2026 – Present
University of Missouri–Columbia, Psychology Department | Columbia, MO

- Cleaned and restructured research database records to improve consistency, organization, and accessibility.
- Validated research records and flagged discrepancies for correction, strengthening data reliability and documentation.

IT Operations Assistant | May 2025 – Aug 2025
A.K.B.T General Construction | Addis Ababa, Ethiopia

- Troubleshot user issues, supported cloud-based tools, and maintained digital job-site reports, timesheets, and equipment logs.
- Contributed to an employee commission-tracking application using React, Node.js, Express, and PostgreSQL to organize commission management.

Peer Learning Assistant | Aug 2024 – May 2025
University of Missouri, College of Engineering | Columbia, MO

- Guided students in UNIX and shell scripting through technical support and feedback.
- Reviewed and graded technical assignments, reinforcing programming and UNIX concepts.

Residential Advisor | Aug 2023 – May 2026

University of Missouri, Residential Life | Columbia, MO

- Supported approximately 300 residents through conflict mediation, resource referrals, and after-hours emergency response.
- Organized student programming and provided one-on-one support to strengthen community engagement.

PROJECTS

Backorder Prediction & Inventory Analysis | Fall 2025
Data Science Project, University of Missouri–Columbia |

- Built machine learning workflows to predict product backorders from approximately 1.7 million inventory records and 22 predictors.
- Cleaned and encoded data, handled missing values, and prepared a balanced sample for model development.
- Compared three pipelines combining anomaly detection, dimensionality reduction, and classification.
- Used exploratory analysis and Tableau to visualize inventory, sales, forecasting, and backorder-risk patterns.

Chicago Crime Data Analysis & SQL Analytics | Spring 2025
Data Analysis Project, University of Missouri–Columbia |

- Analyzed Chicago crime data in PostgreSQL to examine incidents, arrests, offense classifications, and geographic patterns.
- Wrote SQL queries using CTEs, joins, window functions, aggregations, and date-based analysis to identify trends.
- Created SQL views and time-series analyses, including five-year moving averages and district-level comparisons.
- Applied SQL regression analysis to compare gun-crime trends across police districts and citywide patterns.

TigerTraits — Student Matching Web Application | 2024–2025
IT Capstone, University of Missouri–Columbia |

- Developed a student-matching web application using personality and scenario-based responses.
- Built front-end and backend functionality with React, Node.js, and MongoDB.
- Collaborated in an Agile/Scrum team on development, research, analysis, and deliverables.
